Each nozzle shall also be equipped with suitable line guides consisting of metallic shrouds or air blasts.

Hand painting equipment shall consist of suitable brushes, templates and guides necessary to produce satisfactory results.

Cleaning equipment shall consist of the necessary brushes, brooms, scrapers, grinders, high pressure water jets and air blasters required to satisfactorily remove all foreign matter, from the surfaces to be painted, without damage to the underlying pavement.

1. Any moisture or foreign matter is present on the surface

2. The air temperature in the shade is below 40 degrees F
  3. Wind conditions are such as might cause dust to be deposited on the prepared areas or to prevent satisfactory application of the paint and beads.
  4. Painting shall be done only during daylight hours and all painted areas shall be dry enough, before sunset, to permit crossing by traffic. All protective devices shall be removed no later than sunset to allow free movement of traffic at night.
  5. Traffic Stripe paint shall be thoroughly mixed in the shipping container before placing in the machine tank. The paint machine tanks, connections and spray nozzles shall be thoroughly cleaned with thinner before starting each day's work.

Warning signs shall be set up before the beginning of each operation and extra signs shall be kept well ahead of the painting equipment. When necessary, a pilot car shall be used to protect both the traffic and the painting operation. The freshly painted strip shall be protected by cones or other satisfactory devices. On curves exceeding one degree, the alignment of the stripe shall not deviate from the intended alignment by more than 2 inches.

Continued deviation from stated dimensions will be cause for stopping the work and removing the nonconforming stripe.

All stripes and segments of stripes shall present a clean cut, uniform and workmanlike appearance. All markings which fail to have a uniform, satisfactory appearance, either day or night, shall be corrected by the contractor at his expense.

- F. **Corrective Measures:** All work shall be subject to application rate checks for both paint and beads. All traffic stripe which fails to meet the specifications, permissible tolerances and appearance requirements, or is marred or damaged by traffic, or from other causes, shall be corrected at the contractor's expense. All misted areas, drip and spattered paint shall be removed to the satisfaction of the engineer. In all instances, when it is necessary to remove paint it shall be done by means satisfactory to the engineer which will not damage the underlying surface of the pavement. When necessary to correct a deviation, which exceeds the permissible tolerance in alignment, that portion of the stripe so affected shall be removed plus an additional 25 feet in each direction, and a new strip then painted in accordance with these specifications.

- V. **Acceptance and Payment:** All sections of painted stripe, words and symbols which have dried to the extent that the paint will not be picked up or marred by the tires of vehicles, and which have been placed in reasonably close conformity with the specifications, will be accepted, and the contractor will be relieved of the responsibility of the maintenance on such sections.
